Design California's 22nd Mission

You already know that the Spanish planned, designed, and built the 21 missions currently located in California.

The King of Spain has commissioned you and your team to plan and design California's 22nd Mission.

You will create a multimedia document detailing your plans for the next California mission.

1) Where will your mission be located? How did you choose this location? What natural resources are in the area? Climate?

2) Who will build your mission? How will you convince them to build it?

3) What are going to be the major and minor components of your mission? How will you lay them out? Make a detailed diagram including labels, descriptions, and keys.

4. Why is this mission needed? How would building this mission serve Spain?

| Groups of Three: | | | |
|------------------|---|--|--|
| 5. | Will you use any natural resources in the area to produce goods to trade with the other missions? Goods to send back to Spain? | | |
| 6. | Describe a "Day in the Life" of your mission? Make a schedule for a typical priest and for a typical native american in your mission. | | |
| 7. | What will you name your mission? Why? | | |
| 8. | What else to think would be important to include? Please describe. | | |
